Cassida Smartcheck UV paper quality

Revolutionary swipe-detect technology puts an end to awkward verification with detector pens
Swipe a bill and detector beeps if the bill is counterfeit
Additional detection in the form of conventional UV light to verify the UV security thread
Verifies US dollars, as well as Mexican Pesos and most other currencies
Verifies driver's licenses, ID's, credit cards, checks, passports and many others
Smallest footprint of any desktop UV detector in the industry
Ideal for retailers, financial institutions, bars, restaurants and others

Product # : CSDSMARTCHECK

Quantity Per Package : 1

Availability : In Stock

Price : \$55.84

DESCRIPTIONS :

The Smartcheck detects counterfeit bills in foreign currencies such as Canadian dollars (including polymer notes), Euros, Pesos, and most other currencies. There is no need to change settings or have separate machines for different currencies. Built-in ultraviolet illumination can be used to verify checks, credit cards, driver's licenses, passports, social security cards, and many other forms of identification quickly and easily.
