### DESCRIPTIONS :

The Magna Page full page magnifier from Bausch Lomb is a specially designed Fresnel lens that lets you read an entire page of print with considerable ease. Fresnel lens technology permits a large size lens to be much thinner without the weight and volume that a similarly sized conventional lens would require. The Magna Page full page lens is molded rather than hot stamped percent of optical grade acrylic to provide optimum image quality. It provides instant magnification of an entire page so you don't have to constantly reposition the magnifier as you read. Magnifier Type Full Page Lens Magnification 2X Bifocal Magnification Lens Material Acrylic

### SPECIFICATIONS

Item Dimension : 8.25 x 0.25 x 10.75

Case Dimension : 0 x 0 x 0

Sold AS : Case of 1

Case Cube (ft<sup>3</sup>) : 1.0

Case Weight (lbs.) : 10

Comparable Items : Independent
